Version control nightmare

Collaboration by email

`analysis_final.ipynb` `analysis_final_v2.ipynb`

`analysis_FINAL_really.ipynb` `data_correct_NEW.csv`

EXERCISE 1 · VERSION CONTROL

1 · Make a repo
on github.com

2 · Connect VS Code
sign in, bash, git config, clone

3 · Add, commit, push
save version 1 to GitHub

4 · Change and push again
correct dataset, version 2

5 · View the history
compare versions on github.com

EXERCISE 2 · COLLABORATION

6 · Pair up and invite
add each other as collaborators

7 · Make a branch
on your partner's repo

8 · Upload your files
to your branch, then commit

9 · Open a pull request
ask to merge into main

10 · Review and merge
review, merge, check history

Version controlled, collaborative bliss

Every version saved | See what changed | Work together

Version control nightmare

Collaboration by email

`analysis_final.ipynb` `analysis_final_v2.ipynb`

`analysis_FINAL_really.ipynb` `data_correct_NEW.csv`

EXERCISE 1 · VERSION CONTROL

1 · Make a repo
on github.com

2 · Connect VS Code
sign in, bash, git config, clone

3 · Add, commit, push
save version 1 to GitHub

4 · Change and push again
correct dataset, version 2

5 · View the history
compare versions on github.com

EXERCISE 2 · COLLABORATION

6 · Pair up and invite
add each other as collaborators

7 · Make a branch
on your partner's repo

8 · Upload your files
to your branch, then commit

9 · Open a pull request
ask to merge into main

10 · Review and merge
review, merge, check history

Version controlled, collaborative bliss

Every version saved | See what changed | Work together
